5 UNITED STATES DISTRICT COURT
6 WESTERN DISTRICT OF WASHINGTON
7 AT SEATTLE

8 BOB DAWSON, *et al.*,

9 Plaintiffs,

10 v.

11 PORCH.COM, INC., *et al.*,

12 Defendants.

Cause No. C20-0604RSL

ORDER DENYING DEFENDANTS'
MOTION FOR SANCTIONS

13 This matter comes before the Court on defendants' "Motion for Sanctions." Dkt. # 41.
14 Defendants seek terminating sanctions or, in the alternative, the disqualification of plaintiffs'
15 counsel pursuant to the Court's inherent authority and/or 28 U.S.C. § 1927. Having reviewed the
16 memoranda, declarations, and exhibits submitted by the parties, and having heard the arguments
17 of counsel, the Court finds as follows:

18
19 In early 2019, Thomas Alvord, the founder and managing partner of the law firm
20 representing plaintiffs in the above-captioned matter, developed a smartphone application
21 through which users could report spam and, if warranted, initiate suit against those responsible.
22 One such user reported receiving hundreds of spam text messages from defendant GoSmith.
23 While communicating with GoSmith's lawyers about the reports, Mr. Alvord was told that the
24 user had agreed to GoSmith's terms of service, which authorized the communications about
25 which he was complaining. The user denied having created a GoSmith account or having agreed
26

27 ORDER DENYING DEFENDANTS'
28 MOTION FOR SANCTIONS - 1

1 to its terms of service. Mr. Alvord and the user went through the process of creating an account
2 on May 31, 2019, “to see what an account contained.” Dkt. # 61 at ¶ 11. Mr. Alvord used his
3 name, address, and email, but adopted the service the user provided (pool services) and used a
4 fake company name to create a provider account on GoSmith’s website. In order to complete the
5 process, Mr. Alvord had to affirmatively indicate his consent to GoSmith’s Terms of Use and
6 Privacy Policy. Those terms required that “the information you provide us will be accurate and
7 complete” and required Mr. Alvord’s agreement that he would not:

- 9 ● “access, download, monitor, or copy any content or information on the Smith
10 Properties or in the Services through automated or artificial means (including, but
11 not limited to, screen and database scraping, spiders, robots, crawlers, deep-link, or
12 any similar or equivalent automatic or manual process);”
- 13 ● “otherwise obtain or attempt to obtain any content or information through any
14 means that Smith does not intentionally [make] available through the Smith
15 Properties and the Services;”
- 16 ● “harvest information about Consumers or Service Providers from the Smith
17 Properties or the Services;”
- 18 ● “use, or attempt to use, the Smith Properties or the Services through any means
19 not explicitly and intentionally made available, provided or intended;” or
- 20 ● “engineer, decompile, disassemble or otherwise attempt to derive the source
21 code or architectural framework fo the Smith Properties of the Services.”

22
23 Dkt. # 44-1 at 6, 8-9.

24 By the end of 2019, Mr. Alvord had incorporated LawHQ, LLC, and was investigating
25 the numerous reports he was receiving regarding GoSmith’s spamming activities. As part of this
26

1 investigation, he clicked on the unique URL links contained in the messages his clients received
2 from GoSmith and found that the clients' names, phone numbers, and other identifying
3 information were easily accessible. If he changed the last digit of a given URL, another
4 provider's profile page would open and, again, that provider's personal information was
5 disclosed. None of the pages was password protected, no sign in or authentication was required,
6 and his clients (and he) could use the text message link to go to GoSmith's website without
7 having an account.
8

9 Once on a provider's profile page, Mr. Alvord could use his browser's "Developer Tools"
10 to see bits of information that the webpage loaded into the browser but were not otherwise
11 visible. Where the "Developer Tools" disclosed a URL, Mr. Alvord visited the designated
12 webpage. In this way, he could tell whether a provider had created a password for GoSmith
13 and/or accepted GoSmith's Terms of Use: a value of "null" in those fields indicated to him that
14 the provider had not created a GoSmith account and had not, therefore, consented to the spam
15 messages they received from GoSmith. The URL also disclosed where GoSmith had obtained
16 the provider's information, such as the webpages for the Better Business Bureau, Yelp, and the
17 Yellow Pages. Anyone who visited a provider's page and ran "Developer Tools" could access
18 the information described above: no account, password, or sign-in was needed.
19
20

21 Mr. Alvord concluded that GoSmith had scraped other websites for contact information,
22 spammed the identified service providers with text messages offering to sell them leads to
23 consumers, and required the providers to create an account and accept the Terms of Use before
24 viewing the lead. During his investigation, he saved the data he viewed that related to his clients.
25
26 On December 26, 2019, Rebecca Evans, a lawyer at LawHQ, filed a lawsuit in the Northern
27

1 District of California against GoSmith on behalf of two individuals alleging violations of the
2 Telephone Consumer Protection Act (“TCPA”). LawHQ continued to receive complaints
3 regarding GoSmith’s spam.

4
5 In mid-January 2020, GoSmith announced that it would be shutting down its operations at
6 the end of the month. Mr. Alvord had his staff save approximately 3% of the profiles on
7 GoSmith’s website (totaling 340,000 webpages) and hired an internet security expert to verify
8 and document that the information Mr. Alvord was copying was publicly accessible. *See* Dkt.
9 # 62.¹ The expert captured the information from another 100,000 GoSmith webpages just before
10 the company ceased operations. In authorizing these data captures, Mr. Alvord considered
11 various factors before determining that “there was nothing improper in doing so,” including the
12 absence of any viable claim of trade secret in information that had been scraped from third-party
13 websites, GoSmith’s unclean hands in scraping information from websites that prohibited
14 scraping, and case law suggesting that scraping public web content that is not password
15 protected is not a violation of the Computer Fraud and Abuse Act. Dkt. # 61 at ¶¶ 49-53.
16

17
18 At the end of January 2020, GoSmith attempted to convince plaintiffs’ counsel that the
19 text messages sent to her clients had been sent manually and did not violate the TCPA. Ms.
20 Evans was unpersuaded and filed a second lawsuit in the Northern District of California, this
21 time on behalf of 330 individuals. Having learned that GoSmith had been acquired by Porch.com
22 and that its clients were reporting spam from both entities, LawHQ sued not only GoSmith, but
23

24
25 ¹ Dale Rowe, a cybersecurity consultant, confirmed that all of the information Mr. Alvord
26 reviewed and saved was available to the public, could be accessed without circumventing security
27 controls, did not require an account with GoSmith, and did not involve any reverse engineering of
28 compiled code, binaries, or executables. Dkt. # 62 at ¶¶ 27-29; Dkt. # 62-1 at 25.

1 also Porch.com and the corporate officers allegedly responsible for the spam.² Ms. Evans
2 notified defendants of the new filing via email and inquired whether they “would like to
3 seriously discuss a settlement.” Dkt. # 42-1 at 2. Efforts to reach a global settlement were
4 unsuccessful, however. The parties’ positions made compromise unlikely: GoSmith insisted that
5 it had done nothing wrong, and LawHQ maintained that every one of the millions of text
6 messages GoSmith has sent exposed it to statutory damages, with its clients’ claims totaling
7 approximately \$10 billion.
8

9 LawHQ used a number of methods to solicit clients who had received telephone spam and
10 were interested in seeking redress under the TCPA. In connection with GoSmith, LawHQ
11 utilized the contact information it obtained from GoSmith’s provider profiles to target its
12 advertising. Hundreds of individuals have responded to LawHQ’s communications with
13 complaints of spam from GoSmith and/or Porch.com. Despite defendants’ insistence that the text
14 messages sent to LawHQ’s clients did not violate the TCPA, LawHQ has filed a total of thirteen
15 lawsuits against them in the jurisdictions where their clients or defendants reside. LawHQ
16 represents over a thousand individual plaintiffs in these lawsuits. All but one of the cases have
17 now been consolidated in this district.
18
19

20 LawHQ has declined to return the data it copied from GoSmith’s website. Defendants
21 filed this motion seeking an order sanctioning LawHQ, its founder, and plaintiffs’ counsel
22 pursuant to this Court’s inherent authority and/or 28 U.S.C. § 1927, arguing that:

23 (1) LawHQ acted willfully, recklessly, and in bad faith by misappropriating
24 GoSmith’s confidential and proprietary data for personal gain, using it to solicit
25

26 ² Plaintiffs in the first-filed suit amended their complaint to add GoSmith’s parent and corporate
27 officers.

clients and then initiate mass tort actions, while refusing to return the data and (2) LawHQ acted in bad faith by, for example, threatening and then filing additional mass tort actions when Defendants rebuffed their settlement demands.

Dkt. # 41 at 7. Defendants seek dismissal of the lawsuit, disqualification of counsel, an injunction, and monetary sanctions, including reasonable attorney's fees and costs.

A. 28 U.S.C. § 1927³

Pursuant to 28 U.S.C. § 1927, “[a]ny attorney ... who so multiplies the proceedings in any case unreasonably and vexatiously may be required by the court to satisfy personally the excess costs, expenses, and attorneys’ fees reasonably incurred because of such conduct.” Fees are appropriate under § 1927 if “an attorney knowingly or recklessly raises a frivolous argument, or argues a [] claim for the purpose of harassing an opponent, which qualifies as bad faith.” *Caruso v. Wash. State Bar Ass’n*, 2017 WL 2256782, at *3 (W.D. Wash. May 23, 2017) (quoting *W. Coast Theater Corp. v. City of Portland*, 897 F.2d 1519, 1528 (9th Cir. 1990)). Actions taken “with the intent to increase expenses...or delay” may also constitute bad faith worthy of sanctions. *Nielsen v. Unum Life Ins. Co. of Am.*, 166 F. Supp. 3d 1193, 1195 (W.D. Wash. 2016) (citing *NewAlaska Dev. Corp. v. Guetschow*, 869 F.2d 1298, 1306 (9th Cir. 1989)).

Defendants seek an award of the “excess” expenses incurred as a result of LawHQ’s choice to file multiple proceedings on behalf of individuals rather than a class. They maintain that LawHQ made these choices for the improper purpose of increasing defense costs and extorting a large settlement. Plaintiffs have, however, provided reasonable and legitimate

³ Where there is a statute or rule that addresses the conduct at issue, the Court should ordinarily rely on that authority before turning to its inherent powers. *See Chambers v. NASCO, Inc.*, 501 U.S. 32, 50 (1991). The Court will, therefore, determine whether § 1927 is “up to the task” in the circumstances presented here. *Id.*

1 explanations for their litigation choices, namely that LawHQ and their clients prefer individual
2 litigation over class actions, that clients presented themselves over time, necessitating
3 subsequent filings, and that LawHQ filed suits where their clients reside whenever possible (and
4 in California if the client was in a state where LawHQ could not operate). Defendants do not
5 dispute any of these assertions. Their avowed preference for being the targets of a class action
6 does not trump plaintiffs' needs or preferences.
7

8 Defendants also argue that LawHQ's filing and pursuit of meritless claims makes any
9 demand for settlement improper. The merits of plaintiffs' TCPA claim have not been tested:
10 defendants specifically avoided "the merits of the underlying suit" in their motion. Dkt. # 65 at
11 7. LawHQ maintains that it has evidence to support its claims that the offending text messages
12 were automated and asserts that defendants have sent millions of unsolicited messages to its
13 clients, each of which may trigger the significant statutory penalties Congress has established.
14 The Court is not prepared to resolve these issues in the context of this motion. In the
15 circumstances presented, the fact that LawHQ did not accept GoSmith's protestations of
16 innocence and inquired about the possibility of a settlement commensurate with the perceived
17 value of the claims asserted does not establish bad faith or an intent to increase expenses
18 unnecessarily.
19
20

21 Having failed to show either that plaintiffs' claims are frivolous or that LawHQ has
22 litigated those claims in a harassing or vexatious manner, defendants are not entitled to an award
23 of fees or costs under 28 U.S.C. § 1927.
24

25 **B. Inherent Powers**

26 "Federal courts possess certain 'inherent powers,' not conferred by rule or statute, 'to
27

1 manage their own affairs so as to achieve the orderly and expeditious disposition of cases.’’
2 *Goodyear Tire & Rubber Co. v. Haeger*, ___ U.S. ___, 137 S. Ct. 1178, 1186 (2017) (quoting *Link*
3 *v. Wabash R. Co.*, 370 U.S. 626, 630-31 (1962)). The Court’s inherent powers include “the
4 ability to fashion an appropriate sanction for conduct which abuses the judicial process.”
5 *Chambers*, 501 U.S. at 44-45. “Courts have inherent power to dismiss an action when a party has
6 willfully deceived the court and engaged in conduct utterly inconsistent with the orderly
7 administration of justice.” *Wyle v. R.J. Reynolds Indus., Inc.*, 709 F.2d 585, 589 (9th Cir. 1983)
8 (upholding dismissal of complaint pursuant to the court’s inherent power where plaintiff’s
9 denials of material fact were knowingly false and plaintiff willfully failed to comply with
10 discovery orders). *See also Combs v. Rockwell Int’l Corp.*, 927 F.2d 486 (9th Cir. 1991)
11 (affirming dismissal under the court’s inherent power as appropriate sanction for falsifying a
12 deposition). “Because of their very potency, inherent powers must be exercised with restraint
13 and discretion.” *Chambers*, 501 U.S. at 44.

14
15
16 Dismissal is a harsh sanction that is appropriate only where the conduct to be sanctioned
17 is the result of “willfulness, fault, or bad faith.” *Leon v. IDX Sys. Corp.*, 464 F.3d 951, 958 (9th
18 Cir. 2006) (citation omitted). In determining whether terminating sanctions are appropriate, the
19 Court must weigh “(1) the public’s interest in expeditious resolution of litigation; (2) the court’s
20 need to manage its dockets; (3) the risk of prejudice to the party seeking sanctions; (4) the public
21 policy favoring disposition of cases on their merits; and (5) the availability of less drastic
22 sanctions.” *Henry v. Gill Indus., Inc.*, 983 F.2d 943, 948 (9th Cir. 1993) (citations omitted). In
23 addition, “[d]ue process concerns further require that there exist a relationship between the
24 sanctioned party’s misconduct and the matters in controversy such that the transgression
25
26

1 ‘threaten[s] to interfere with the rightful decision of the case.’” *Anheuser-Busch, Inc. v. Nat.*
2 *Beverage Distributors*, 69 F.3d 337, 348 (9th Cir. 1995) (quoting *Wyle*, 709 F.2d at 591).

3 Dismissal is not warranted here. Mr. Alvord’s misconduct, if any, occurred when he
4 created a GoSmith provider account that misstated the professional services he was offering to
5 consumers. Defendants have not argued, and there is no evidence, that Mr. Alvord used that
6 account to do anything other than to see what a provider would see on the GoSmith page and to
7 confirm that his client was unfamiliar with the process and had not, in fact, agreed to GoSmith’s
8 terms of service. The existence of that account did not create the causes of action at issue here,
9 nor does it appear that plaintiffs intend to use information acquired through that account to prove
10 their claims. Mr. Alvord may have violated GoSmith’s Terms of Use when he created a provider
11 account for a fictitious company, but the alleged deception or wrongdoing is “wholly unrelated
12 to the merits of the controversy.” *Phoceene Sous–Marine, S.A. v. U.S. Phosmarine, Inc.*, 682
13 F.2d 802, 806 (9th Cir. 1982). Terminating sanctions based on allegations of wrongdoing that
14 will have no impact on the administration of justice in this case would be an abuse of discretion.
15 *Id. See also Halaco Eng’g Co. v. Costle*, 843 F.2d 376, 380 (9th Cir. 1988) (reversing dismissal
16 where alleged misconduct peripheral to merits of case).

17 What defendants are complaining about - namely, the accessing of GoSmith’s webpages
18 and copying of information found there - was accomplished through the links that GoSmith had
19 sent to LawHQ’s clients. At the very least, GoSmith invited these providers to the webpage
20 specified by the URL, and it imposed no limits on their access once there. Defendants have not
21 shown that LawHQ’s use of its clients’ links was improper, that the provider information found
22 there was maintained in confidence, or that any rule, statute, or contractual provision prohibited
23

1 LawHQ's foray into other publicly accessible pages of GoSmith's site.

2 When acting under its inherent powers, a district court must find either (1) a willful
3 violation of a court order or (2) bad faith. *See Evon v. Law Offices of Sidney Mickell*, 688 F.3d
4 1015, 1035 (9th Cir. 2012). Defendants do not allege a willful violation of a court order and
5 therefore must show bad faith, such as conduct done vexatiously, wantonly, or for oppressive
6 reasons. On the record before it, the Court finds that defendants have failed to show wrongful,
7 much less bad faith, conduct. In the absence of sanctionable conduct that threatens the
8 administration of justice, none of the relevant considerations – (1) the public's interest in
9 expeditious resolution of litigation; (2) the court's need to manage its dockets; (3) the risk of
10 prejudice to the party seeking sanctions; (4) the public policy favoring disposition of cases on
11 their merits; or (5) the availability of less drastic sanctions – militate in favor of dismissal.
12

13
14 The Court also has the power to use its inherent powers to manage the litigation before it
15 by, for example, barring witnesses, excluding evidence, awarding attorney's fees, or assessing
16 fines. *F.J. Hanshaw v. Emerald River Dev., Inc.*, 244 F.3d 1128, 1136 (9th Cir. 2001).
17 Defendants request that the Court disqualify LawHQ from representing plaintiffs in this matter,
18 require a full disclosure and return of all information copied from GoSmith's webpages, and to
19 retain all evidence of or relating to its access to and copying of provider information from
20 GoSmith's site. LawHQ's conduct, as reflected in the current record, involved no deception
21 towards the Court and poses no threat to the orderly administration of justice in this case. Having
22 failed to show sanctionable conduct, no sanctions are warranted.⁴ In light of this dispute,
23
24

25 ⁴ At oral argument, defense counsel reiterated its assertion that GoSmith had copied not only
26 provider information, but also information regarding GoSmith's homeowner clients. To the extent
27 LawHQ copied homeowner account information, it shall return the information and make no further use

1 however, plaintiffs and LawHQ shall refrain from altering or destroying any of the information
2 copied from GoSmith's website until this litigation is finally resolved.
3

4
5 For all of the foregoing reasons, defendants' motion for sanctions (Dkt. # 41) is DENIED.

6 Dated this 17th day of August, 2021.
